

How to Install fotoShout (beta)

1. Login to the iTunes store with your iPad or mini-iPad, download & install fotoShout. *(If you haven't already done so)*
2. Go <http://fotoshout.com/> (Computers must be running Windows 7 or Windows 8 – 64 bit operating system).
 - a. login to fotoShout at <http://fotoshout.com/>
 - b. At the top of page click on “**Downloads.**” Download and Save the zip file to your computer.
 - i. A dialog box may pop up after the download completes, usually in the lower left corner of your computer screen, “**fotoShout Client_1.3_Zip is not commonly downloaded and could be dangerous.**” Click on the down triangle icon next to the word “**Discard**” select “**Keep**”
 - c. Unzip file; (right click file, select “**Extract All**”) After extraction your will be viewing 2 files.
 - i. fotoshout _1.3_ WIN64.exe
 - ii. IIS.bat file
 - d. This is **IMPORTANT** –
 - i. **Right click** the **IIS.bat** file, a popup menu will open. Select “**Run As Administrator.**” The file will install, follow the prompts, it takes a minute or two. When complete text within a Black Dialog box will display “**Press Any Key To Continue**”
 - ii. After IIS is installed **Right Click** the “**fotoShout _1.3WIN64.exe**” file. Select “**Run as Administrator**” A dialog box will pop up – “*fotoShout client requires the following items to be installed on your computer.*” **Click the Install button.** This can take a while to install. *(Be patient this can take a while. fotoShout is installing your database)* Reboot Computer
 - e. This portion of setup is **unique to fotoShout Beta**, and only needs to be done onetime on each event computer.
 - i. Go to Windows Explorer. Type in **%programdata%\fotoshout** press **enter** on the keyboard. Open the “**SyncSettings.config**” file (**see images below**)
 - ii. Scroll down to **password** and **user name**. Replace the entered e-mail address with your **e-mail address**. Replace the word password with your actual “**password.**”
 - iii. Go to Windows Explorer, type in- **%windir%\system32\services.msc** A dialog box will open. Scroll down to “**fotoShout Sync Service.**” Left click on “**fotoShout Sync Service**” to highlight. Click **Start** the Service. (**see images below**) Please note; Part of the message in the highlighted area will display “**Started**” and “**Automatic,**” but you still need to click “**Start Service**” the very **first** time you install fotoShout.

fotoShout software setup is complete
