How to Install fS Software Win 7

USER GUIDE #02-W7

How to Install fotoShout Windows 7

To Install fotoShout in a Windows 8.x System - see users guide #2-W8

Do Not Install fotoShout Without Reviewing This Guide First

Be sure to Review "Tips" at end of guide

1. Login into the Apple App store with your iPad (or iPad mini), download & install the fotoShout App.
2. Go http://fotoshout.com/   Computers must be running Windows 7, or Windows 8.x - 64 bit operating system.
   a. login to fotoShout at http://fotoshout.com/
   b. At the top of page click on "**Download**."   Save the zip file to your computer.
      I. A dialog box **may pop** up after the download completes, usually in the lower left corner of your computer screen stating, "**fotoShout Client_1.3_Zip is not commonly downloaded and could be dangerous**." Click on the **Down Triangle Icon** next to the word "**Discard**" select "**Keep.**" Click "**Keep**."
   c. Unzip file; (right click file, select "**Extract All**"). After extraction your will be viewing 3 files.
      I. fotoshout _1.3_WIN64.exe
      II. IIS.bat file
      III. fotoShout Email and Password Installer.exe
   d. This is **IMPORTANT** –
      I. Disable your Firewall, and Anti-virus during installation and setup. We have found some antivirus software cause issues **during** setup.
      II. **Right click** the **IIS.bat** file, a popup menu will open. Select "**Run As Administrator.**" The file will install, follow the prompts, it takes a few minutes. When completed, a Black Dialog box will populate the screen, displaying the Text - "**Press Any Key To Continue**" Press a key.
      III. After IIS is installed **Right Click** the "**fotoShout _1.3WIN64.exe**" file. Select **"Run as Administrator"** A dialog box will pop up – *"fotoShout client requires the following items to be installed on your computer." **Click the Install button**. (Be patient this can take a while. fotoShout is installing your database)*
      IV. The text "Success" will appear. Continue to wait, another dialog box will open, click "**Finish**."
      V. Reboot Computer
3. **Setting up your Password & Username** *(username is your E-mail address)* can be accomplished with the "fotoShout E-mail and Password Installer" or manually.

   A. **Install Password with "fotoShout E-mail and Password Installer"**
      1. Right click on the fotoShout E-mail and Password Installer.exe file.
      2. Select and click "**Run as administrator**"
      3. Enter your E-mail address (user name) and password issued to you by fS.

      4. Click "**Save**"

5. To Exit Program press "Ctrl+Alt+F12" or press "Stop" in the corner of screen.

6. After clicking "Save," The fotoShout installer will process, and install your password and Email (username).

7. When the install is completed a dialog box will open; "**Email and password are updated.** Click the **"OK"** button. If you don't see the dialog box, look for it behind your other open windows.

B. **Manually Install Password and Email**.

1. Go to Windows Explorer. Type in "**%programdata%\fotoshout**" (without the quotes) press "**Enter**" on the keyboard. Open the"SyncSettings.config" file **(see images below)** *When Clicking on "Syncsettings.config" if you have **Never** viewed this type of file before, Windows will ask you what program you would like to use to read this file. Right Click on "syncsettings.config," Click on "**More Options**". Select and click on "**Notepad**". **Syncsettings.config** will now open.*

2. Scroll down to "**password**" and "**user name**". Replace the entered e-mail address with your **e-mail address**. Replace the word "**password**" with your actual "**password.**"

3. Click on "**File**", then Click **"SAVE"**

4. Go to windows Explorer. Type **"%windir%\system32\services.msc**" *(without the quotes)* press "**Enter**." A dialog box will open. Scroll down to "**fotoShout Sync Service**." Left click on "**fotoShout Sync Service**" to highlight. Click **Start** the Service. **(see images below)** *Please note; Part of the message in the highlighted area will display "Started" and "Automatic," but you still need to click "Start Service" the very **first** time you install fotoShout*.

Right Click syncSettings
Open with Notepad

```
syncSettings - Notepad
File  Edit  Format  View  Help
<?xml version="1.0" encoding="utf-8" ?>
<appSettings>
  <!-- Count by seconds -->
  <add key="TimerInterval" value="60" />
  <!-- FotoShout Web API Info-->
  <add key="FsApiClientBaseAddress" value="http://localhost/api" />
  <add key="FsApiServerBaseAddress" value="http://na1.fotoshout.com/api" />
  <add key="FsApiPrefix" value="fs1" />

  <add key="DbClientSyncClass" value="FotoShoutUtils.Sync.Db.FilteringSqlClientSync, FotoShoutUtils"/>
</appSettings>
```

fotoShout Sync Service

Start the service

Description:
This service is used to transfer events and photos between this PC and the central server

fotoShout software setup is complete

See Tips on last page

TIPS

I. When installing a program in Windows 7.x be sure to **Right Click** program, select *"Run as Administrator".*

II. When Clicking on *"Syncsettings.config"* if you have **Never** viewed this type of file before, Windows will ask you what program you would like to use to read this file. Right Click on "syncsettings.config," Click on "**More Options**". Select and click on "**Notepad**". **Syncsettings.config** will now open.

III. Unclicking Windows Features can disable fotoShout, or stop images from transferring to your tablet. An example; Images transfer to your tablet, but only a square empty gray box is displayed with text, "**No Image**." Somebody (a rouge program) probably deselected the "**Static Content**" check box. Solution; reselect and click "**OK**"
